***Allowable Subject Matter***

1. Claims 1-22 and 29-41 are allowed.

***Reasons for Allowance***

2. The following is an examiner's statement of reasons for allowance:
3. Viking discloses a collapsible staircase system with a rail element, a plurality of stair elements, one baluster element, and a center support system. Viking does not disclose a plurality of baluster elements that are supported by at least one rail element and that in turn support the plurality of stair elements. Furthermore, Viking does not disclose a plurality of telescoping elements comprising a plurality of slot receptacles for position guidance and a corresponding plurality of coupling members.
4. All other prior art of record also fails to teach these claimed limitations. The concept of collapsible staircases is known in the art, but the stair elements in the prior art are self-supported and lack baluster elements and railings. In contrast, the stair elements of the invention are not self-supported, instead being supported by balusters, which are supported by rail elements.
5. Furthermore, it would not be obvious to combine any of the prior art references of record in order to arrive at a collapsible staircase with a plurality of baluster elements that are supported by at least one rail element and that in turn support the plurality of stair elements.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
